AFTER

DEDICATION

Once a great man said that the greatest thing one can do for mankind is to serve him. With service then, as their goal, these two people have given so very much to the students of Langlois for so many, many years. With great pride and pleasure we dedicate this Year Book of 1956 to Mr. and Mrs. James Crew.

BILL MILLER

Student Body

CLASS PROPHECY

This is the year 2000. This past century has been filled with many personalities who will live forever in the minds of our countrymen. Upon checking the lives of many of these people we find that many of them graduated from Langlois High School in 1956. These famous people say they owe everything to their Alma Mater and to the ones who so carefully and painstakingly guided their way in those by-gone years.

We found these alumni in almost every walk of life. Calvin Penberthy, at the recent timber-man convention attended by lumbermen from all over the world, was chosen the world's greatest all-time logger. Distinguished by many years of fine work in the wine field Bill Miller has recently won a Nobel Prize for his thesis on wine making. Of the great advances in the science world, the one of greatest use to mankind was the discovery of a cure for the common cold by Rosalie Turner. The Marines haven't been the same since Bobby Jean Sypher has injected her new military methods into the system. The new bookkeeping method devised by Connie Storm won him a service medal award from the National C. P. A. organization The "A" and "H" lines were completely obliterated by the styles of Gayla Walker--Paris never had it so good! One of the greatest opera stars, Doris Brinkman, recently signed for a full time job with the Metropolitan Opera House. The Florence Nightingale of this century is Sharon Groleau who has recently received a Congressional Medal of Honor for her Service during an "A" Bomb attack. Gordon Britton who has always been a hand with cows is maintaining his record as an outstanding "Old Cowhand"; he owns a large herd of cattle in Southern Oregon. Darrell Wigle, is a successful car dealer. He owns the largest Henry J dealership in the U. S. We now have the Mother of Education. Velma Ann White gave to the U. S. a new teaching method, which revolutionized the educational world. Jeanette Thompson, won applause from thousands of housewives and satisfied husbands for her marvelous contributions in home economics. Without a doubt Jeanette is the new Bitty Crocker If you like to hear some cool music, Wilbur Jensen and his Jazzy Jumpers are at the peak of their popularity Wilbur is still blowing that fine horn after all these years. Gary Steddom continued his growth after leaving L. H. S. till he soared to the height of 7'2". He is acclaimed the new white "Goose Tatum". Arlene Kerber is still fond of her couch. Remember how she use to recline on the couch in the health room? Now she is a famous psychiatrist with some originality; she lies on the couch while her patients to get their treatments. If you want to see Mary Shoop you will have to go to the Belgium Congo, where this feline Dr. Livingston is bringing aid to thousands of natives. Joan Cox became a famous social worker doing more than her share to clean up the slum areas along the Pacific Coast. After having his mental difficulties straightened out by Dr. Kerber, Bill McDonald, went on to become a great engineer. He was responsible for the construction of a subway from New York to London.

ED. NT. And so it seems the class of 1956 has made a small bid for fame and fortune. Let us hope our prophecy comes true, especially with good luck and God's Blessings a gift for them all.
